Technical Support Overview

Repair and Maintenance

Customer Trouble Reporting Information & Procedures

I. REPORTING TROUBLE

- ❑ Customer should call 8-MOSAIC-N05 (**866-724-2605**) or NOC@Mosaicnetworx.com, if any of the following conditions occur:
 - Total Outage
 - Partial Outage
 - Quality Issues
 - Access, Equipment Testing and Verification
 - Status on Trouble Ticket

- ❑ Customer should provide the following information to the Mosaic NOC Technician:
 - Company Name
 - Local contact name, telephone number and access hours
 - Physical address of the Trouble being reported
 - Mosaic NetworX Circuit ID and/or DID number
 - Customer should also be able to identify the type of services
 - Description of the problem occurring including date and time
 - Has power, equipment and trunking been checked?
 - If reporting a circuit related issue, is the circuit released for testing?

Customer Trouble Reporting Information & Procedures

II. REQUESTING STATUS ON AN ACTIVE TICKET

- ❑ Customers should call the Mosaic NetworX 24x7 support center **8-MOSAIC-N05 (866-724-2605)** for trouble ticket Issues.
- ❑ Each trouble ticket is prioritized per the resolution guidelines outlined on the following slide.
- ❑ The Mosaic NOC technician will provide the customer with trouble ticket status; every attempt will be made to contact the customer within the specified timeline objectives/goals.

Escalation Levels

Priority	Definition	Status Updates
PRIORITY 1	Outage Severity tickets on all bandwidths and all access types where circuit is down or degraded and customer releases circuit immediately and continuously until trouble is resolved.	During Outage Time, 24x7 – Every 60 min
PRIORITY 2	Degraded circuits. Partial use of service, intermittent problems and quality issues where customer does not give immediate and continuous test access.	Status updates - Every 2hrs At customer's request, additional status updates will be provided at four hour intervals
PRIORITY 3	Quality issues	Status Updates (Mon. - Fri., 8 am – 5pm) Every 4 Hours during the business hours listed. At customer's request, one additional status update will be provided outside of the normal business hours listed above.
PRIORITY 4	When customer is requesting access to the carrier's co-located equipment OR When customer is requesting assistance in testing equipment OR When customer would like to verify connectivity with the carrier	Status updates – every 12-hours

MTTR- Local Transport and Data (Mean Time To Repair)

Priority 1	=	4 hours
Status Updates	=	1 hour
Priority 2	=	8 hours
Status Updates	=	2 hours
