

# Mosaic NetworX California Teleconnect Fund

Your **Go-To Provider** for California Teleconnect Fund Services.

## What is the CTF

The California Teleconnect Fund was established in 1996 as a way for the state to promote universal access to telecommunications technology for organizations, groups, and businesses with limited or restricted funding. Mosaic NetworX offers Internet and voice services as part of this program. This Fund is financed by a surcharge placed on California consumers of intrastate telecommunications services.
